

Dear Mr. Blattenberger:

As you probably know, the Central Intelligence Agency has been authorized to construct a new headquarters building and our plans are proceeding for this facility to be located on the Bureau of Public Roads Research property in the vicinity of Langley, Virginia. In line with our over-all objective to consolidate all of our headquarters personnel and activities in one building, we anticipate consolidating all of the printing and reproduction facilities which now service the Agency. While it will probably be about three years before we actually move to our headquarters, the architect is now in the process of drawing detailed plans and specifications.

Inasmuch as the GPO-State Service Printing Plant located in the basement of this Agency's Administration Building at 2430 "E" Street, N. W., is now doing a substantial part of our work, I believe that it would be mutually advantageous for our representatives to meet at an early date to discuss this matter and to work out a plan which can be implemented at the appropriate time with a minimum of inconvenience to both agencies. If this is agreeable to you, Colonel L. K. White, one of my Deputy Directors, will be glad to represent me in this matter.

Sincerely,

Allen W. Dulles  
Director
